

Parents - Here is a note from Dayton Children's Hospital about MRSA:

If you've been reading the newspapers or watching TV, you may have heard about some high-profile cases of MRSA, or methicillin resistant Staphylococcus aureus, affecting area students. Because you are a FamilyWise subscriber, you are receiving this special community health alert.

To help you protect your child, the infectious disease experts at Dayton Children's want to make sure you have the latest, most accurate information on MRSA.

Please take a moment to review an informative Q&A about MRSA on our website.

http://www.childrensdayton.org/Health_Topics/News_Publications/MRSA_and_Staph_Q&A.html

Dayton Children's encourages you to talk to your child's pediatrician or family doctor about MRSA if you are concerned about the best way to protect your child.

We hope you find this information useful in caring for your child.

Sincerely,

Dayton Children's
